EDUCATION

- Indian Institute of Information Technology, Una (IIIT Una)** Una, Himachal Pradesh, India
Bachelor of Technology (B.Tech) in Computer Science and Engineering Aug 2023 – June 2027; CGPA: 6.3/10.0
- VCDSN GOVT Inter Collage** Karanprayag, Uttarakhand, India
Class 12th UK Board - 80% Apr 2016 – Jun 2022
Class 10th UK Board - 87%

TECHNICAL SKILLS

Programming Languages: TypeScript, Java, JavaScript, Python, SQL, C, C++

Frameworks & Libraries: Firebase, React, Next.js, Express.js, Node.js, Tailwind CSS

Backend : Go, Supabase, PostgreSQL, RESTful APIs, MongoDB, MySQL, GitHub Actions, WebSockets, JWT Authentication

Developer Tools: Git, GitHub, VSCode, Postman, Figma, Terminal

Operating Systems: Linux, Ubuntu, Windows

Soft Skills: Leadership, Public Speaking, Communication, Find New Solution, Networking

PROJECTS

- CodeSync — Next.js 14, TypeScript, Stream, Convex, Clerk, WebRTC** Jan 2025 – July 2025
 - Build a full-stack real-time collaboration platform leveraging **WebRTC, Stream SDK, and Next.js 14** App Router, enabling video conferencing, screen sharing, and session recording.
 - Achieved sub-150ms media signaling latency by optimizing WebRTC signaling flow and implementing efficient state synchronization logic.
 - Optimized frontend performance with **TypeScript, TailwindCSS, Shadcn UI, and component-driven architecture**, improving responsiveness across 10+ modules.
- Portfolio Frontend – Personal Portfolio Website** Nov 2025 – Dec 2025
 - Developed a responsive portfolio using **Next.js, React, TypeScript, and Tailwind CSS**, implementing reusable UI components.
 - Engineered metadata schema and semantic HTML structures across 8+ pages, increasing Google Lighthouse SEO score from 72 to 92 and reducing page load time by 28%.
 - Reduced initial time 35% through code-splitting, image optimization, and efficient asset bundling, improving cross-device performance.
- Gen UI — Next.js 14, TypeScript, TailwindCSS, Shadcn UI** Jan 2025 – Feb 2025
 - Developed an **AI-powered UI generation platform** that converts natural language prompts into modern, responsive web components.
 - Designed scalable and reusable UI components using **TypeScript and TailwindCSS**, improving frontend maintainability and development efficiency.
 - Implemented real-time preview and integrated RESTful APIs with optimized asynchronous requests to enhance application responsiveness and user experience.
- UberClone – Real-time Ride Booking Platform** Jan 2026 – Present
 - Engineered a real-time ride booking system handling simulated concurrent users, achieving driver-rider match resolution in under 180ms using WebSocket-based event streaming.
 - Implemented secure **JWT authentication, role-based access control (RBAC), RESTful APIs**, and fare calculation algorithms for trip lifecycle management.
 - Improved query performance by 40% using indexed PostgreSQL queries and normalized schemas, ensuring scalable trip and payment management.

LEADERSHIP & ACHIEVEMENTS

- Exicutive Member, EPMOC (Sept 2024 – July 2025) — IIIT UNA.**
- Sharpened Data Structures and Algorithms expertise through consistent problem-solving on LeetCode and GeeksforGeeks, solving 450+ problems across arrays, graphs, DP, and advanced topics; strengthened analytical thinking and optimization skills for real-world engineering challenges.
- 3rd Position — District Volleyball Tournament.
