## Brief

---

### Aspiring Full Stack Web Developer & DSA Enthusiast

I am Aman Roniwal, a third-year student at IIIT Una, with a strong passion for building real-world web applications and mastering core programming concepts. My journey in tech began with C and C++, and I am currently diving deep into Data Structures and Algorithms (DSA) using C++ to sharpen my problem-solving abilities.

My growing interest in web development has led me to explore and build with modern technologies like React, TypeScript, Next.js, Node.js, TailwindCSS, Express.js, and MongoDB, alongside core skills in HTML and CSS. I strive to create fast, responsive, and scalable applications with clean code and modern UI.

## Education

---

**Indian Institute Of Information Technology Una**

*B.Tech in Computer Science and Engineering,*

**Aug '23 - May '27**

*Una, Himachal Pradesh*

**VCDCN GIC School**

*Class XII (PCM) - 80 %*

**Apr '21 - Apr '22**

## Projects

---

**CodeSync | Next.js 14, TypeScript, Stream, Convex, Clerk, WebRTC** [Click here](#)

**Apr '25**

- Built a secure full-stack real-time collaboration platform with video calls, screen sharing, and recording, improving team efficiency by 60%. Leveraged Stream SDK & WebRTC for low-latency media, boosting retention by 35%. Integrated Clerk authentication & Convex real-time sync for scalable sessions, and delivered a responsive UI with TailwindCSS & Shadcn across 10+ projects.

**Quick AI | Next.js 14, TypeScript, TailwindCSS, Shadcn**

- Built the responsive front-end for Quick AI, an AI-powered platform with features like article & blog generators, image tools (generation, background & object removal), and resume analysis.

## Experience

---

- Fresher

## Achievements

---

- Solved 300+ questions on leetcode or GFG.

## Technical Skills

---

**Languages:** C, C++, Javascript

**Developer Tools:** VS Code, Git, GitHub

**Technologies/Framework:** TailwindCSS, React, Express, MongoDB, HTML, CSS, Typescript, Nextjs, Node.js
