EDUCATION

- Indian Institute of Information Technology, Una (IIIT Una)** Una, Himachal Pradesh, India
Bachelor of Technology (B.Tech) in Computer Science and Engineering Aug 2023 – June 2027; CGPA: 6.3/10.0
- VCDSN GOVT Inter Collage** Karanprayag, Uttarakhand, India
Class 12th UK Board - 80%
Class 10th UK Board - 87% Apr 2016 – Jun 2022

TECHNICAL SKILLS

Programming Languages: TypeScript, Java, JavaScript, Python, SQL, C, C++

Frameworks & Libraries: Firebase, React, Next.js, Express.js, Node.js, Tailwind CSS

Backend : Go, Supabase, PostgreSQL, RESTful APIs, MongoDB, MySQL, GitHub Actions, WebSockets, JWT Authentication

Developer Tools: Git, GitHub, VSCode, Postman, Figma, Terminal

Operating Systems: Linux, Ubuntu, Windows

Soft Skills: Leadership, Public Speaking, Communication, Problem Solving, Networking

PROJECTS

- CodeSync — Next.js 14, TypeScript, Stream, Convex, Clerk, WebRTC** Jan 2025 – July 2025
 - Engineered a full-stack real-time collaboration platform leveraging **WebRTC**, **Stream SDK**, and **Next.js 14** App Router, enabling video conferencing, screen sharing, and session recording.
 - Architected scalable authentication and state synchronization using **Clerk (JWT-based auth)** and **Convex real-time database**, ensuring low-latency bidirectional updates.
 - Optimized frontend performance with **TypeScript**, **TailwindCSS**, **Shadcn UI**, and **component-driven architecture**, improving responsiveness across 10+ modules.
- Portfolio Frontend – Personal Portfolio Website** Nov 2025 – Dec 2025
 - Developed a responsive portfolio using **Next.js**, **React**, **TypeScript**, and **Tailwind CSS**, implementing dynamic routing and reusable UI components.
 - Implemented SEO optimization techniques including metadata configuration, semantic HTML, and performance tuning for improved Lighthouse scores.
 - Enhanced UX with optimized asset loading, modular folder structure, and scalable component architecture.
- Quick AI — Next.js 14, TypeScript, TailwindCSS, Shadcn** Oct 2024 – Dec 2024
 - Designed a feature-rich frontend for an **AI SaaS platform** supporting content generation, image processing, and resume analysis workflows.
 - Integrated **API-driven** architecture with efficient state handling and asynchronous request management.
 - Structured scalable UI components using TypeScript strict typing and modular design patterns to improve maintainability.
- UberClone – Real-time Ride Booking Platform** jan 2026 – Present
 - Engineered a real-time ride booking system using **Next.js**, **Node.js**, **Express**, **PostgreSQL**, and **WebSockets**, enabling live location tracking and driver-rider matchmaking.
 - Implemented secure **JWT authentication**, **role-based access control (RBAC)**, **RESTful APIs**, and fare calculation algorithms for trip lifecycle management.
 - Optimized backend performance with normalized DB schemas, indexed queries, and event-driven socket architecture achieving **less than 200ms** update latency.

LEADERSHIP & ACHIEVEMENTS

- Excicutive Member, EPMOC (Sept 2024 – July 2025) — IIIT UNA.**
- Sharpened Data Structures and Algorithms expertise through consistent problem-solving on LeetCode and GeeksforGeeks, solving 450+ problems across arrays, graphs, DP, and advanced topics; strengthened analytical thinking and optimization skills for real-world engineering challenges.
- 3rd Position — District Volleyball Tournament.
